

Huntington Beach Green Scorecard Pilot Program

The City invites you to participate in this Pilot Program.

The City of Huntington Beach is developing a Green Scorecard program to aid and promote development of an environmentally friendly community. As part of this program the City has developed a draft green scorecard for homeowners to be considered for the Pilot Program. This Pilot Program will consider 3-5 residential projects and will last 3-6 months. The Green Scorecard is an easy and simplified way to go green in HB, in the most convenient and efficient manner possible. This program is designed to elevate the public's awareness of future state and city initiatives.

Going Green is creating environmentally sensitive, energy conscious and healthy communities. This process aims to improve **Quality of Life, Economy and Environment through:**

- » Energy efficiency
- » Water conservation and reduction of runoff
- » Indoor environmental quality
- » Waste reduction
- » Smart growth and sustainable development
- » Environmentally friendly services, materials and products

Who may participate: The full program will be aimed at both remodel and new construction for private homes, condominiums and apartments. This Pilot Program is limited to private residential refurbishment or single lot new development.

What are the Benefits: Your benefits in going green are quality of life, reduced operating costs and knowledge that you are contributing to greening Huntington Beach. In addition, the Pilot Program incentives include recognition by the city and application for the Huntington Beach Environmental Board annual awards. The future program is anticipated to include additional incentives per Council decision.

How to Participate:

- 1) Fill out and submit an Application.
- 2) Complete and submit the checklist planned features column (a Pilot Program Team member is available to assist).
- 3) Complete the project and submit an updated checklist indicating features accomplished.
