**Analysis:** The City was awarded funds under the Orange County Transportation Authority (OCTA) Arterial Highway Rehabilitation Program (AHRP) for a total of fourteen street rehabilitation projects over three fiscal years. Gothard Street (Attachment 1) is the final project in this award. The following table reflects the funding breakdown of awarded federal dollars and City matching funds required for the construction contract.

<u>Street</u>	<u>Project</u>	<u>Limits</u>	<u>AHRP Award</u>	<u>City Match (Gas Tax)</u>
Gothard	CC-1154	Ellis to Heil	\$190,923	\$447,594.45

Rehabilitation of the roadway generally will include pavement crack sealing, grinding, selective pavement reconstruction and asphalt overlay. This project also includes placing new signing/stripping, new traffic detection loops and adjustment of existing water valves, manholes and similar appurtenances to the new surface. Pavement rehabilitation work of this nature will increase the life of the arterial street by approximately 10 years.
