

CITY OF HUNTINGTON BEACH

CAPITAL IMPROVEMENT PROGRAM

Fiscal Years 2008/09 through 2012/13

Introduction

The Capital Improvement Program (CIP) identifies the major public improvements to the city's infrastructure over the next five years. In general, the CIP includes new projects and upgrades to existing facilities of \$50,000 or more. Funding will be authorized for the first year of the program upon adoption of the Fiscal Year 2008/09 budget. Future years include planned programs and are described more generally. The CIP is a comprehensive document that includes projects with unexpended funds, or continuing appropriations, from Fiscal Year 2007/08.

Organization of the CIP

The CIP is arranged in sections. The narrative identifies funding sources and categories of projects. The second section summarizes the projects by year showing total costs for each project. Graphs provide a visual distribution of projects into categories and funding sources. The final section contains individual project sheets for each category, organized alphabetically by type of improvement. The project sheets identify the estimated cost of the project design and construction. Staff hours for engineering design, project management, and inspection are included within the individual project budgets.

CIP Goals

The CIP is developed to address elements in the city's General Plan, as well as City Council adopted planning documents and master plans. Projects correspond to the Strategic Plan Goals adopted by the City Council in 2006. Specific Goals identified in the CIP include Infrastructure, Land Use and Economic Development, and City Services.

CIP Preparation Process

The CIP is prepared in conjunction with the annual budget. Proposed projects are submitted to the Public Works Department. Public Works staff compiles the document and prepares the draft program. The CIP is presented to the Public Works Commission (PWC) for review and comments. During the year, individual projects are taken to the PWC prior to advertising for bids. The Planning Commission reviews the CIP to ensure conformance with the General Plan. The final CIP is approved by the City Council and adopted with the budget. In accordance with the City Charter, continuing appropriations must be reallocated into the new fiscal year budget.

CIP FUNDING SOURCES

Funds for capital improvement projects are provided through a variety of sources. Two major sources for the CIP are Special Revenue Funds and Enterprise Funds. Both categories are restricted, with expenditures limited to certain types of projects.

A *Special Revenue Fund* is used to account for the proceeds of revenue sources that are restricted to expenditure for specific purposes. Special Revenue Funds include entitlement or subvention funds and developer fee funds. Examples of entitlement funds are Gas Tax or Measure M whereby funds are distributed based on population. Developer funds, such as Traffic Impact Fee or Drainage Fee, must be used to mitigate demands on the infrastructure from new development in accordance with an adopted plan.

Enterprise Funds are proprietary funds used to account for activities with an associated user charge. Enterprise Funds are maintained by adopted rates and are not subsidized by the General Fund. User rates support the full cost of operations, maintenance, capital, and reserve requirements. Water and Sewer Service are the two enterprise funds most commonly used for CIP.

SPECIAL REVENUE FUNDS

Air Quality Fund 201

The Air Quality Fund revenue is from AB 2766 that apportions a percentage of the air quality fee from motor vehicle registrations to local jurisdictions. Eligible expenditures must show a quantifiable reduction in exhaust emissions. An annual report on qualifying expenditures is submitted to the Southern California Air Quality Management District (SCAQMD). Capital project expenditures must meet minimum requirements for emission reductions. The Air Quality Program funds part-time bus drivers to supply transportation services to senior citizens for nutrition, medical appointments, shopping, and other needs.

Traffic Impact Fund 206

The Fair Share Traffic Impact Fee (TIF) program was established to implement the goals and objectives of the Circulation Element of the General Plan. Revenues ensure that the adopted Level of Service standards for arterial roadways and signalized intersections are maintained when new development occurs. Fees are calculated on a per trip generated basis. Projects eligible for TIF funding include roadway widening, certain new traffic signals, and signal modifications that improve traffic circulation.

Gas Tax Fund 207

Gas Tax funds support the overall planning, maintenance, and operation of the city's transportation system. Funds may be used for development review, transportation modeling, traffic signal operation and coordination, and streetlight system maintenance. Gas Tax use complies with state regulations and is directly related to street construction or maintenance. Revenue is distributed by the State according to established percentages and based on population.

Park Acquisition and Development Fund 209

The Park Acquisition and Development (PAD) Fund is comprised of developer fees to be used for acquisition, development, and renovation of parks, beaches, recreation facilities, and amenities. The goal is to improve the quality of life in Huntington Beach by creating facilities that meet the needs and desires of the community. Fees are collected for parkland and open space acquisition with the intent of providing a variety of recreational opportunities for all age groups. Funds cannot be used for maintenance activities. State law requires annual and special financial reports of fund expenditures.

Measure M Fund 213

Measure M expenditures are programmed for street and transportation system enhancements. Costs include engineering and construction for projects such as street rehabilitation; pedestrian concrete maintenance, and street tree replacements. The use of Measure M funds must comply with County regulations and directly reflect to street improvements. Measure M revenues are from the ½ cent sales tax approved by voters and levied by the County of Orange. Funds are dispersed to cities on

a per capita basis. Annually, the city presents a seven year proposed project plan to the Orange County Transportation Authority (OCTA) to maintain eligibility for Measure M funds. In addition to funds distributed directly to the city, the OCTA administers competitive grant programs known as the Combined Transportation Funding Program (CTFP) that has resulted in several million dollars for street improvement funds to Huntington Beach.

Traffic Congestion Relief Funds Fund 218

Assembly Bill 2928 established the Traffic Congestion Relief Fund to allocate funds to cities and counties for roadway maintenance purposes. Allocations are calculated per capita, in the proportion that the total population of a city bears to the total population of all cities in the state. The Orange County Proposition 42 City Aid Program will distribute \$10 million annually to Orange County cities, based on population. The City of Huntington Beach allocation is approximately \$700,000.

Highway Safety and Traffic Reduction Proposition 1 B Fund 219

In November 2006, voters in the State of California approved State Proposition 1B, the Highway Safety, Traffic Reduction, Air Quality, and Port Security Bond Act of 2006. The measure authorizes the state to sell about \$20 billion of general obligation bonds to fund transportation projects, improve the movement of goods, improve air quality, and enhance the safety and security of the transportation system. Approximately \$11.3 billion is allocated to state and local road rehabilitation. The total anticipated revenue to the City of Huntington Beach is \$6.33 million, over a period of four years.

ENTERPRISE FUNDS

Water Fund CIP Fund 506

Water user rates fund the Water Fund Capital Improvement Program. In addition to operations and maintenance, water rates are committed for major maintenance and rehabilitation of water facilities such as wells, reservoirs, water distribution lines, and water meters. The water system operation is assisted by a sophisticated data transmission program. System upgrades, water facility security improvements, and water main replacement are anticipated capital expenditures.

Water Master Plan Fund 507

The Water Master Plan (WMP), adopted in 1990 and updated in 2000 and 2005, recommends new facilities to provide the city with adequate water production and storage capabilities. Several projects included in the 2000 WMP are complete, including three storage reservoirs, three water wells, and various pipeline improvements. In the next two years, the WMP focus is on corrosion control and transmission main improvements. Design and construction of the Southeast Reservoir, booster station and transmission lines will be completed over the next five years.

Sewer Service Fund Fund 511

The Sewer Service Fund was established to maintain, rehabilitate, and replace sewer facilities. Revenue is derived from user charges to residents and businesses with connections to the city sewer lines. Capital projects include rebuilding sewer lift stations and lining or replacement of sewer lines, as designated in the 2003 Sewer Master Plan. Facilities are evaluated regularly to determine priorities to repair or replace facilities. The capital project program includes design, engineering, and all aspects of construction management.

General Fund Capital Project Funding

The General Fund Capital Improvement Reserve (CIR) is calculated after the final audit for each fiscal year and allocated the following year. Funds in excess of required reserves are distributed to the CIR and the Infrastructure Fund in accordance with the City Council adopted financial policies. The use of CIR funds is discretionary as to the type of activity; however proposed projects qualify as capital improvements. Typical CIR projects are substantial facility improvements and studies. Infrastructure Funds are used for capital projects that improve the various city systems and facilities.

GRANTS AND MINOR CIP FUNDS

Each year, department staffs apply for and receive various grant awards. The CIP document includes only grant funds that assist in developing or improving the infrastructure. By pursuing grant opportunities, the city is able to maximize local project funds.

- Community Development Block Grant (CDBG)
Sidewalk, curb, and gutter construction in enhancement areas; community center renovations and citywide Americans with Disabilities Act (ADA) improvements
- Safe Neighborhood, Parks, Clean Water, and Coastal Protection Bond Acts
Urban runoff diversion and water quality projects; park improvements

- OCTA Master Plan of Arterial Highways (MPAH) Growth Management Areas (GMA)
Street widening and traffic studies
- Federal Hazard Elimination Safety (HES)
Traffic signal modifications
- California Safe Routes to School (SR2S)
Traffic safety improvements near elementary and middle schools

CIP CATEGORIES

Drainage and Water Quality: Drainage projects include storm drain line construction or rehabilitation, drainage pump station construction, and drainage system facilities. The water quality component addresses urban runoff, retention basins, and other facilities that may improve the quality of water discharged to local water bodies as well as comply with the Citywide Urban Runoff Management Plan (CURMP).

Facilities: Capital improvements to facilities can be modifications to existing buildings or new construction. Typical projects are those that exceed the normal maintenance budgets such as the replacements of roofs, elevators, and climate control systems. Upgrades include energy efficiency conversions and improvements to meet the technological needs of the staff and the community.

Neighborhood: Localized improvements to limited residential or other specific areas are categorized as neighborhood. Annual projects include residential pavement overlays, concrete, and street tree replacement. Neighborhood projects may be in the Enhancement Areas and eligible for CDBG funding. Street and drainage improvements in the Merged Redevelopment Agency Areas are categorized as neighborhood projects.

Parks and Beaches: Park and beaches projects include new park construction and renovation, including improvements to city beach facilities. Funding may be Park Acquisition and Development, state bond allocations, grants, or Capital Improvement Reserve. The park system is developed in accordance with the Park Strategy Fee and Nexus Study (2001), as well as the City General Plan Community Services and Recreation component. Parks and beaches contribute to the quality of living in Huntington Beach by preserving open space and providing recreational opportunities for residents and visitors.

CIP CATEGORIES

Sewer: Improvements to the city sewer system consist of sewer line and sewer lift station rehabilitation, as well as routine maintenance. Improvement projects are based upon the 2003 Sewer Master Plan, as well as maintenance demands. The program to replace sewer lift stations is on a two-year cycle, with design the first year and construction the second year. Five stations have been rebuilt since 2001.

Streets and Transportation: This category highlights improvements to the city arterial streets and traffic control systems. Projects may include street widening, pavement rehabilitation, and traffic signal installation. Funding sources are primarily Gas Tax, Measure M, OCTA, and Federal grants and Traffic Impact Fees. The Pavement Management Plan, General Plan Circulation Element, and Traffic Signal Priority List are source documents for these projects. Typical street improvements are pavement and concrete replacement, road widening, and grade adjustments. Improvements to the

citywide transportation system include new traffic signals, signal modifications, and signal communications upgrades. Projects are intended to improve traffic flow throughout the city.

Water: Water projects include the rehabilitation of existing components, as well as, the construction of new storage and production facilities. Water main replacements and well rehabilitations are funded through the water rates as Water Fund CIP. Water Master Plan Funds provide capacity upgrades and new facilities as recommended in the Water Master Plan. The replacement, corrosion protection, and upgrade of steel water distribution mains, and large water transmission lines throughout the city are ongoing projects.

Capital Improvement Program *Fiscal Year 2008/09*

In Fiscal Year 2008/09, over \$42 million in new improvements is proposed. Additionally, \$14 million of continuing appropriations for projects approved last year will be brought forward into the new fiscal year. The primary funding sources for capital projects remain restricted revenue funds and enterprise funds. Transportation, water, sewer, and park improvements are the largest expenditure categories.

Projects for the Water, Water Master Plan and Sewer Service enterprises correspond with the adopted master plans and major maintenance programs. Planned sewer improvements include construction of a \$2.5 million lift station, design of a lift station and the annual sewer line rehabilitation program. Approximately \$3.5 million in water line replacements is included in the water capital improvement program. Construction will begin on the Water Operations Yard

to accommodate the sewer and drainage operations, storage requirements and staff. The annual corrosion control program will continue to upgrade the water system.

Streets and transportation projects for Fiscal Year 2008/09 include \$8.5 million for arterial streets and \$2 million for traffic flow enhancements. State bond funds, approved by the voters as Proposition 1B, will be expended on arterial rehabilitation. Additional state funds as directed by State Proposition 42 (AB 2928) provide funding for residential pavement improvements. Safe Routes to School grants will be used for traffic signals and new signage to improve pedestrian and bicycle safety in the vicinity of two elementary schools and one middle school. Two street widening projects, Heil Avenue and Atlanta Avenue, received grant appropriations from the Orange County Transportation Authority (OCTA). Construction will continue on the Newland Avenue widening south of Hamilton Avenue. Other transportation improvements include new traffic signals, signal modifications, and roadway capacity studies. These projects address the City's Strategic Plan goals of improving citywide transportation.

In the past two years, approximately \$9 million in Redevelopment Agency revenues was programmed for capital projects. The one-time revenue funds eligible city improvements within the Merged Redevelopment Project Areas including street rehabilitation and streetlight system replacements in the Downtown Area. Among the projects is the installation of beach restrooms north of the pier and three permanent buildings on the pier that will be constructed in 2008/09. The city will construct a visitor's kiosk in Pier Plaza for operation by the Conference and Visitor's Bureau. These projects respond to the Strategic Plan goal of creating an environment to support tourism.

Neighborhood improvements totaling \$4.6 million is budgeted for residential streets, sidewalk, and street tree replacement. This includes \$3 million from Measure M to replace concrete and street trees per the approved petition process.

Continuing park projects include the reconfiguration of Edison Park to accommodate youth sports and expansion plans for LeBard Park. New projects are design of a skate park, an environmental assessment of Bartlett Park, and new public restrooms at Worthy Park and the beach north of the pier. Park Acquisition and Development (PAD) and State Park Bonds Funds are allocated. Community Development Block Grant (CDBG) appropriations will fund Americans with Disabilities Act (ADA) improvements at the City Gym and Edison Community Center.

Approximately \$4 million is anticipated from the Federal Water Resources Development Act and is directed to the construction of a new storm drain pump station. The General Fund Capital Improvement Reserve (CIR) supports continuing renovations at the Central Library, designing a fire station remodel, landscaping the Central Library parking lot islands, dredging Chris Carr Lake, and repairing a slope near Lambert Park.

An eighth ball field will be constructed for the Central Park Sports Complex. Seismic retrofit of the City Hall building is on schedule for completion in 2009.

Infrastructure Funds are allocated to major facility maintenance. Projects include roof

replacement and slope reinforcement at the City Yard. The windows at the Civic Center will receive an energy efficient tint application. The roof and window tint projects will improve the energy efficiency of city buildings.

The CIP includes projects that further Huntington Beach as an inviting tourist destination, as well as, serve the local community. Residents and visitors will benefit from the infrastructure improvements that enhance our daily lives.

PROJECT TITLE:
Heil Pump Station Relocation

FUNDING DEPARTMENT: Public Works

DEPT. PROJECT MGR: Jim Wagner

ESTIMATED SCHEDULE: Potential funding through the Federal Water Resources Development Act FY 09/10.

PROJECT LOCATION

PROJECT DESCRIPTION: Design and construct Heil Pump Station at a larger location.

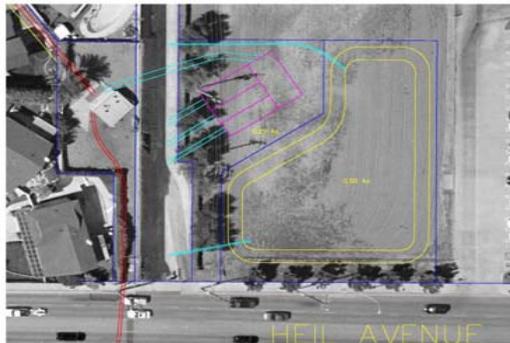

PROJECT NEED: Old storm water pump stations in need of replacement due to age and wear, as well as lack of sufficient capacity. This project constructs a new station to meet flows from the 100-year storm and incorporate new storm water Best Management Practices.

SOURCE DOCUMENT: Citywide Urban Runoff Management Plan (2005)

PROJECT TITLE:
Downtown Street Lighting
Replacement

FUNDING DEPARTMENT: Public
Works
DEPT. PROJECT MGR: Robert
Stachelski

ESTIMATED SCHEDULE:
Construction to be completed by
April 2010

PROJECT LOCATION

PROJECT DESCRIPTION: Replace 50 to 70 year old high voltage streetlight system with new light standards, conduit, etc. First project expected to replace up to 6 blocks of existing lighting.

PROJECT NEED: Existing system is severely corroded in many places and operates at a 4,000 to 6,000 volts (versus standard 120/240 volt systems). System is also a series circuit versus parallel. Combination of high voltage and system degradation increase risk in performing maintenance and construction projects in the area.

CATEGORY: Transportation

CITY OF HUNTINGTON BEACH CAPITAL IMPROVEMENT PROJECT INFORMATION

PROJECT TITLE: Traffic Studies for Warner/ PCH & Bolsa Chica Street

FUNDING DEPARTMENT:
Public Works
DEPT. PROJECT MGR: R. Stachelski

ESTIMATED SCHEDULE:
Studies complete by August 2009

PROJECT DESCRIPTION: The Warner/PCH Study will identify alternatives to improve overall operations at the intersection. The study will focus on capacity improvements options and an assessment of environmental impacts. The Bolsa Chica Study is a joint effort with the City of Westminster to investigate options for operating and configuring Bolsa Chica Street. The study is funded by an OCTA grant and is expected to lead to future projects.

PROJECT NEED: Improved traffic flow and congestion reduction; improve communication between cities to manage traffic.

SOURCE DOCUMENT: Master Plan of Arterial Highways; Growth Management District

STRATEGIC GOAL: C-1 Improve Transportation

CITY OF HUNTINGTON BEACH CAPITAL IMPROVEMENT PROJECT INFORMATION

PROJECT TITLE: Corrosion Control

FUNDING DEPARTMENT: Public Works

DEPT. PROJECT MGR: Duncan Lee

ESTIMATED SCHEDULE:

Multi-year project; Final construction Complete
FY 10/11

PROJECT DESCRIPTION: This project is a major component of the 2005 Water Master Plan, to survey, study, and install Cathodic Protection Systems on large water transmission mains.

PROJECT NEED: To insure efficacy of cathodic protection systems. Corrosion control protects water facilities by transferring corrosion to a non valuable metal strategically placed in the ground. Various appurtenances of the distribution system will also be improved.

SOURCE DOCUMENT: 2005 Water Master Plan and routine water maintenance program

STRATEGIC PLAN GOAL: I-1 Improve Infrastructure
