FINDINGS FOR CEQA:

The Planning Commission finds that the development agreement was included in the scope of the Murdy Commons Mixed Use Project Environmental Impact Report (EIR No. 10-002) certified by the Planning Commission on February 8, 2011.

FINDING FOR APPROVAL – DEVELOPMENT AGREEMENT NO. 11-001:

The development agreement is consistent with the General Plan and Beach and Edinger Corridors Specific Plan (BECSP). Development Agreement No. 11-001 provides for the construction of the Boardwalk Mixed Use Project, which complies with the BECSP development code and was found to conform to the goals and policies of the General Plan as approved by the Planning Commission on February 8, 2011. The development agreement ensures the construction of 57 affordable housing units within the project in accordance with the provisions of the BECSP for a 55-year period. The development agreement is consistent with the following General Plan goals and policies:

A. Circulation Element

Goal CE 2: Provide a circulation system which supports existing, approved and planned land uses throughout the City while maintaining a desired level of service on all streets and at all intersections.

B. Housing Element

Goal H 2: Provide adequate housing sites to accommodate regional housing needs.

Goal H 3: Assist in development of affordable housing.

Policy H 3.1: Encourage the production of housing that meets all economic segments of the community, including lower, moderate, and upper income households, to maintain a balanced community.

C. Land Use Element

LU Goal 2: Ensure that development is adequately served by transportation infrastructure, utility infrastructure, and public services.

LU Policy 2.1.2: Require that the type, amount, and location of development be correlated with the provision of adequate infrastructure and services (as defined in the Circulation and Public Utilities and Service Elements).

Policy LU 8.1.1: Accommodate land use development in accordance with the patterns and distribution of use and density depicted on the Land Use Plan Map, in accordance with the principles discussed below:

- a. Not applicable
- b. Vary uses and densities along the City's extended commercial corridors, such as Beach Boulevard.
- c. Increase diversification of community and local commercial nodes to serve adjacent residential neighborhoods.
- e. Intermix uses and densities in large-scale development projects.
- f. Site development to capitalize upon potential long-term transit improvements.
- g. Establish linkages among community areas, which may include pedestrian and vehicular paths, landscape, signage, other streetscape elements, open space, transitions, in form, scale, and density of development, and other elements.

Goal LU 9: Achieve the development of a range of housing units that provides for the diverse economic, physical, and social needs of existing and future residents of Huntington Beach.

Goal LU 11: Achieve the development of projects that enable residents to live in proximity to their jobs, commercial services, and entertainment, and reduce the need for automobile use.

Policy LU 11.1.4: Require the incorporation of adequate onsite open space and recreational facilities to serve the needs of the residents in mixed use development projects.

The development agreement would ensure that the project is developed in accordance with the approved Boardwalk development plan, which provides a housing choice for residents seeking to be within walking distance of school, work, services or entertainment and reduce dependency on their automobile. The development agreement would guarantee that the project provides 57 on-site affordable housing units, including 10 very-low income units. These units would help the City to satisfy its affordable housing obligations while providing housing for various income levels. In addition, the development agreement stipulates the project's monetary contribution for a planned at-grade railroad crossing to provide pedestrian access to the Bella Terra shopping, dining and entertainment uses as well as to enhance connectivity amongst the planned mixed use residential developments and Goldenwest College in the area, and it reiterates the requirement for on-site public open space. Finally, the development agreement specifies the project's traffic mitigation fees, which would provide the project's fair share contribution for improvements to the circulation system that are necessary to mitigate cumulative traffic impacts from development within the BECSP.

MOTION APPROVED

FINDINGS FOR PROJECTS EXEMPT FROM CEQA:

The Planning Commission finds that the project will not have any significant effect on the environment and is exempt from the provisions of the California Environmental Quality Act (CEQA) pursuant to section 15301, Class 1, of the CEQA Guidelines, which states that operation and minor alteration to existing structures involving negligible or no expansion are exempt from further environmental review.

FINDINGS FOR APPROVAL - CONDITIONAL USE PERMIT NO. 11-011:

1. Conditional Use Permit (CUP) No. 11-011 to permit the sales and service of alcoholic beverages for on-site consumption within a 1,200 sq. ft. restaurant will not be detrimental to the general welfare of persons working or residing in the vicinity or detrimental to the value of the property and improvements in the neighborhood. The proposed use is not anticipated to generate adverse noise or safety impacts to the surrounding businesses and residents. It is ancillary to the existing restaurant and the dining area is located at the front of the unit, oriented toward the north parking lot and away from residential uses to the south. The restaurant use was previously approved by CUP No. 96-7 to operate with more than 12 seats. In addition, the restaurant is adequately buffered from adjacent residences by a minimum 6 ft. high block wall and approximate 40 ft. drive aisle width.

2. The proposed sales and service of alcoholic beverages ancillary to an eating and drinking establishment is compatible with surrounding uses because it is located within an existing commercial center and surrounded by similar commercial uses. The proposed dining area is located at the front of the unit, oriented toward the north parking lot and away from residential uses to the south. As conditioned, the sales and service of alcohol will be limited to the interior of the building. The proposed hours of operation are also consistent with existing commercial uses and therefore will not generate impacts to adjacent noise-sensitive uses above the existing conditions.
3. The proposed sales and service of alcoholic beverages will comply with the provisions of the Beach and Edinger Corridors Specific Plan, other applicable provisions in Titles 20-25 of the Huntington Beach Zoning and Subdivision Ordinance and any specific condition required for the proposed use. The proposed use for alcohol sales and service requires a conditional use permit subject to review and approval by the Planning Commission. Because the restaurant use with more than 12 seats was previously approved by CUP No. 96-7, parking requirements applicable to the use is in compliance.
4. The granting of the conditional use permit will not adversely affect the General Plan. It is consistent with the Land Use Element designation of M-sp-d (Mixed Use – specific plan – design overlay) on the subject property. In addition, it is consistent with the following policies and objectives of the General Plan:

A. Land Use Element

Objective LU 7.1 Accommodate the development of a balance of land uses that (a) provides for the housing, commercial, employment, cultural, entertainment, and recreation needs of existing and future residents, (b) provides employment opportunities for residents of the City and surrounding subregion, (c) captures visitor and tourist activity, and (d) provides open space and aesthetic relief from urban development.

Policy LU 7.1.1 Accommodate existing uses and new development in accordance with the Land Use and Density Schedules.

The proposed use increases the economic viability of the establishment by offering the sales and service of alcoholic beverages to accommodate the needs of residents and visitors. The restaurant use with more than 12 seats was previously approved for the unit and is consistent with the existing commercial uses in the shopping center.

B. Noise Element

Objective N 1.8 Minimize the generation of excessive noise level impacts from entertainment and restaurant/bar establishments into adjacent residential or “noise sensitive” land uses.

The proposed use of alcohol sales and service is not anticipated to result in negative impacts on adjacent uses. The restaurant and alcohol service will be limited to between the hours of 11 AM and 10 PM. The dining area is located at the front of the unit and oriented away from residential uses. The building is sufficiently buffered from adjacent residences by an approximate 40 ft. wide drive aisle and minimum 6 ft. high blockwall. With the alcohol service limited to the interior of the unit, proposed hours and building

setback, the proposed use is not anticipated to impact surrounding noise-sensitive land uses.
