City of Huntington Beach

Project Description
(Revised 3/29/05)

General Information

The Home Depot proposes to construct a new store (the "Store") within the existing Kmart shopping center located at the southwest corner of Magnolia Street and Garfield Avenue in Huntington Beach, California. The Store, which will replace the existing Kmart structure, will be comprised of an approximately 102,102 square foot building with adjacent Garden Center measuring approximately 24,772 square feet.

The Kmart shopping center is now being used in conjunction with the Taco Bell of approximately 2,994 square feet. The Home Depot is applying for a Conditional Use Permit. With the approval of this application, the Home Depot will be permitted to demolish the existing Kmart, construct a new Home Depot, and reconfigure the parking field.

Proposed Uses

The proposed use is for the retail sales of building supplies, lumber, hardware, and associated items such as appliances, barbeques, pool accessories, home furnishings, patio furniture and materials associated with home maintenance and repair. The project includes an outdoor garden center/nursery for retail sales of plant and nursery items. The proposed use will also include incidental activities such as the rental of tools and equipment for construction and gardening and home improvement projects.

Two flat bed trucks for use by customers will be stored outside the store in designated parking stalls. Other items to be temporarily stored outdoors prior to pick up will be pallets located in the "Pallet Enclosure"; baled cardboard and recyclable materials inside the receiving area.

Store Operations

The proposed Store will employ approximately 200 employees during three daily shifts. Approximately 30 percent of these employees will be transferred from other local facilities in order to train new employees and manage the Store. The Store's hours of operation will vary during the week but will generally range from 5:30 AM to 11:00 PM, with the option of remaining open for business between the hours of 7:00 AM – 7:00 PM Monday thru Friday.

Typical daily deliveries normally include 2-3 flatbed trucks of lumber along with 10-15 light duty or semi trucks for delivery of other building materials and home improvement products. Delivery appointments will normally be scheduled for late afternoon and the morning hours. The company will receive deliveries 24 hours per day.

The potential exists for some lumber, merchandise, plant materials, and "will call" orders to be temporarily stored at the side of the building. Some plant materials may be temporarily displayed outside, adjacent to the Garden Center. Baled cardboard and recyclable materials may be temporarily stored outdoors, within the receiving area. Refuse will be processed in a compactor unit located within the dock area at the rear of the building, and a satellite dish for communication will be installed on the roof/parapet system.
