DATE: July 18, 2007

SUBJECT: Citywide Bridge Study

Staff is in the process of completing a Citywide Bridge Study. The Study includes the inspection of 36 bridges with recommendations for maintenance, rehabilitation, or replacement. Also included within the Study are cost estimates that will allow the City to budget for these activities over the coming years. Preparation of the Study is also an eligibility requirement for Federal grants, which can be used for design, rehabilitation and construction.

Staff is concurrently coordinating with the Orange County Flood Control District to determine our respective obligations towards maintenance of those bridges which cross their channels.

The final Study is expected to be completed in the next few weeks and will then be presented to the City Council in conjunction with the proposed Capital Improvement Program.

Attachments: None at this time. A copy of the final report will be available upon request.
