Travis K. Hopkins, PE
Director

Department of Public Works
(714) 536-5431

It's that time again to get the required annual certified test reports submitted for your backflow prevention devices.

ENCLOSED ARE THE ONLY TEST FORMS PROVIDED.

(generic test forms are provided online or by your certified tester)

Help Save Time and Resources?

- Maintain your knowledge on your backflow device maintenance and testing arrangements. Use our web site to check compliance status of your devices.
www.surfcity-hb.org/cross_connection
- Read the test forms/notices carefully. They provide information such as when the test was last performed, the tester's name, phone # and the month the test report is due every year.
- Mark your calendar to complete the required annual test report each calendar year.

Please use the enclosed test report form as it will be the only copy sent to you in order to help process the annual testing. The list on the reverse side is provided for you to hire a certified tester to test your device(s). Please be sure your tester completes the test forms (with repairs noted) and submits a passing test report to the City's Utilities Division, Cross Connection Control (CCC) before the due date stated on the test form. Test forms must either be emailed (PDF) to CrossConnection@surfcity-HB.org OR mailed to the City of Huntington Beach, Utilities Division, P. O. Box 190 Huntington Beach, CA. 92648.

Failure to comply with these requirements will result in delinquent fees charged to your water account and subsequent discontinuance of water service.

NOTE: • Testing and any necessary repairs must be performed by an Orange County certified backflow tester. • Approval from a Huntington Beach CCC Specialist is required before replacing or relocating a device. • These requirements and process are in accordance with the City of Huntington Beach Cross Connection Control Ordinance 14.16.190, and Title 17 of the California Administrative Code, to **prevent contamination** from entering into the public water system. *There is over 7,500 backflow devices in the system to be tested every year.*

Your cooperation is greatly appreciated.

- For more information, please visit: www.surfcity-hb.org/cross_connection •

Thank you.

Staff assigned to enforcement:

Mike Pojar

Cross Connection Control Specialist

Utilities Division, City of Huntington Beach

**CITY OF HUNTINGTON BEACH
BACKFLOW PREVENTION DEVICE
CERTIFIED TESTERS LIST**

Sept 2016

WWW.SURFCITY-HB.ORG/CROSS_CONNECTION

Please choose a certified tester from this list to perform backflow device testing and maintenance. These testers maintain the required OCHCA certification and have submitted a copy of their HB business license. It is recommended that a determination be made regarding the tester's liability insurance.
