Labor Day Holiday Affects Trash Collection and Street Sweeping

Trash Collection

Due to the observance of the Labor Day holiday on Monday, September 4, trash collection and street sweeping will be on holiday schedule. Trash will not be collected on Monday, September 4. All residents should place trash for collection on the day after their regular route day. For example, residents on Monday's route should place their trash for collection on Tuesday, Tuesday's route on Wednesday, and so on for the entire week. Friday's route will be collected on Saturday. The regular collection schedule resumes on Monday, September 11.

Street Sweeping

There will be no street sweeping on Monday, September 4 (First Monday route). Streets that are not swept due to holidays are not rescheduled. Due to the trash collection holiday, trash carts are at the curb one day later than usual, which conflicts with scheduled sweeping days in many neighborhoods. Residents should place trash carts at the curb per the holiday schedule. Most neighborhoods with trash carts at the curb on sweep day will not be swept and parking control will not be enforced. The following areas may have street sweeping, but no parking citations will be issued:

- ◆ Areas with an alternate side sweep schedule
- ◆ Areas with trash collection in rear alley

If you have questions about the holiday maintenance schedule, please contact the Public Works Maintenance division at 714-960-8861.

COMMUNITY DEVELOPMENT DEPARTMENT

PARKSIDE CONSTRUCTION PLANS NOW IN REVIEW FOR PERMITS

In 1996, Shea Homes commenced the process to obtain approval for developing single family homes on 50 acres located west of Graham St., along the East Garden Grove Wintersburg Flood Control Channel. Since the property is in the Coastal Zone, final approval was required by the California Coastal Commission. In 2012, the Coastal Commission approved development of the property subject to several conditions. Shea Homes has been working to complete the conditions and recently submitted construction drawings to the City’s Building Division for building permits. The project will include the following components:

- ◆ 111 single-family homes
- ◆ 23 acres of preserved, restored and enhanced open space
- ◆ Public trails, vista overlook and a 1.6 acre neighborhood park
- ◆ Creation of a water quality treatment system that will treat over 25% of the dry-weather flow from the Slater watershed that currently flows untreated to Bolsa Chica and the Ocean.
- ◆ Upgrades to the City’s Slater Pump Station that improves the City’s ability to handle storm flows
- ◆ Improvements to the flood protection system that will remove thousands of properties from the flood zone.

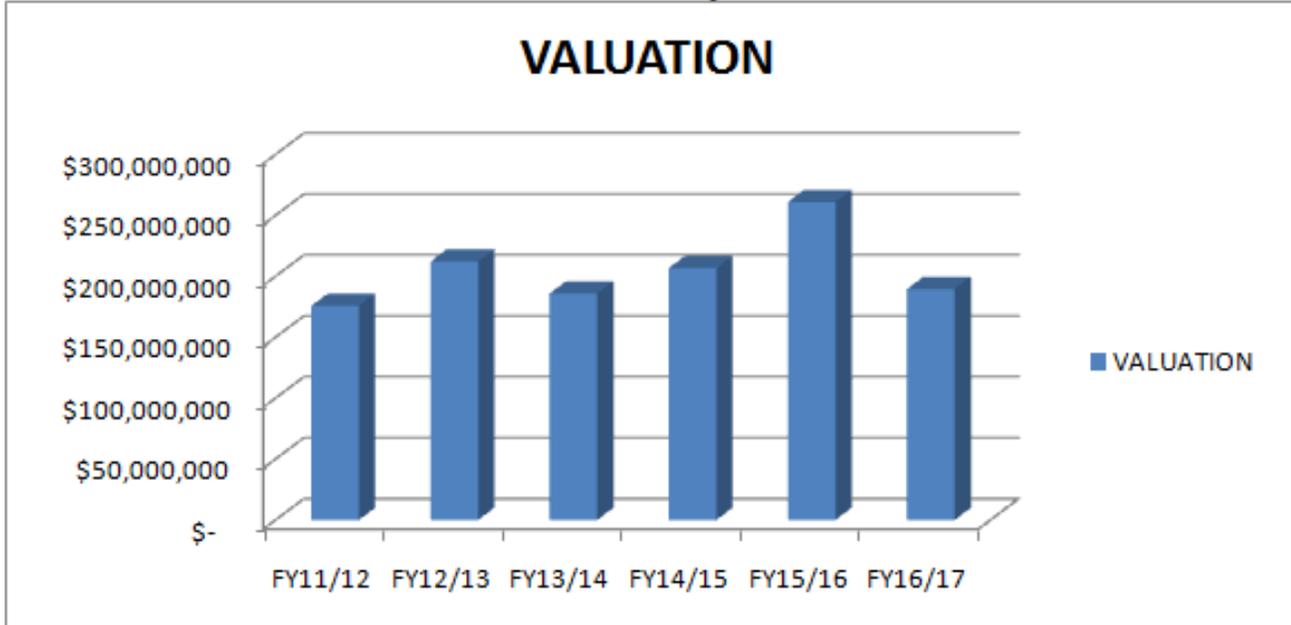

It is anticipated construction of all homes will take two and a half years.
