PUBLIC WORKS DEPARTMENT

The “Bolsa Chica Waterline Extension Project” was completed early this summer. The project is located in the California State Lands where Graham Street ends at the beginning of the Bolsa Chica Ecological Reserve. The two pipelines that were installed will provide redundancy in water supply for the neighborhoods that abut the Bolsa Chica Ecological Reserve. The project also spread gravel over an area that was a complete mud wallow earlier this year. The gravel will help reduce blowing dust in the dry months and help to keep the area passable in the wet month.

Photo from January 23, 2017 on the left showing the flooded area. Photo from June 14 on the right shows the same area with the new gravel cover.

Street Maintenance on PCH Walking Path This Week

Our Public Works Street Maintenance will complete an asphalt slurry seal project along the walking path (boardwalk) on Pacific Coast Highway from Goldenwest Street to Sixth Street this week. Please try to find alternative routes as to minimize traffic in the area on Wednesday, June 28 and Thursday, June 29. Please abide by all posted signage and exercise caution in and around the project area.

Thank you for your patience and cooperation as Street Maintenance works to complete this project. If you require additional information, please contact Brent Mirth, Street Maintenance Crew Leader, at 714-960-8861.

International Downtown Association Visits to Study Huntington Beach Business Improvement District

The City and the Downtown Business Improvement District (BID) welcomed representatives of the International Downtown Association (IDA), which was retained by the BID at the direction of the City Council, to bring an advisory panel of Downtown professionals from across the nation. They are in process of preparing a report to the City and to the BID. IDA President and CEO David T. Downey, who was part of the evaluation team, had the following to say about their recent visit:

“As part of our collective vision for downtown Huntington Beach, we're energized and reinvigorated by the direction IDA's advisory panel recommended for us this morning. The BID, downtown stakeholders and the city are enthusiastic about the direction of our downtown and the development of a unified direction for our organization moving forward. With impassioned leadership and a clear strategy for the future, we are confident our shared vision for downtown will bring with it the improvements and direction we all desire.”

More information about the report will be available in the near future.

Naugles Selects Surf City for its Second Permanent Restaurant

Huntington Beach is abuzz with the recent announcement that Naugles will soon open in a permanent home in September along Warner Avenue, just east of Bolsa Chica. The current owners of Naugles fought hard to revive the brand after being absorbed into the Del Taco Corporation. The new owners (also dedicated fans) victoriously opened a permanent test kitchen restaurant in Fountain Valley, eventually expanding to the incredibly popular coastal location across from the Waterfront Hilton in summer 2016. When the temporary beachside location ends, the permanent location will welcome employees from the beach to serve scores of happy and hungry taco, burger and bean-cup eaters sure to arrive.

Total construction valuation for Fiscal Year-To-Date (June 2016 – May 2017) is \$169,537,549 which is comparable to last year at this time which was \$170,176,401. On a year-to-date basis, total housing starts for new residential units are on even par at 34 single family residences when compared to FY15/16. Never Leave Your Child Alone in a Car Program

Heatstroke is the leading cause of non-crash, vehicle-related deaths for children, and it can happen to anyone, anywhere. These tragedies are 100% preventable.

Did You Know?

- ◆ A child is at much higher risk of heat stroke because their body heats up three to five times faster than an adult's body.
- ◆ More than half of heatstroke deaths occurred when a distracted caregiver forgot a quiet child was in the vehicle.
- ◆ Sunlight can raise the indoor temperature of a car by 19°F in just 10 minutes and it will continue to rise. At 104°F, the body begins to shut down, and at 107°F, death occurs.

Together we can reduce the number of deaths and near misses by remembering to **ACT**.

- **Avoid** heat stroke-related injury and death by:
 - Never leaving your child alone in the car, even for a minute.
 - Consistently locking unattended vehicle doors and trunks.
- **Create reminders and habits** that give you and your child's caregiver a safety net:
 - Establish a peace-of-mind plan. When you drop off your child, make a habit of calling or texting all other caregivers, so all of you know where your child is at all times.
 - Make a habit of looking in the vehicle before locking the door and walking away
 - Place an item that is needed at your next stop in a back seat.

Set the alarm on your cell phone or computer calendar as a reminder to drop your child off at childcare.
- **Take action** if you see an unattended child in a vehicle:
 - Dial 911 immediately and follow the instructions that emergency personnel provide . Wait by the vehicle so EMS can find you quickly.

FIRE DEPARTMENT

Garfield Avenue/Seapoint Street

On June 17, fire units responded to citizen actively being stung by a large swarm of bees in the area. Units found one person who had been stung multiple times and had a large amount of bees tangled in their hair. One Firefighter was stung multiple times while attempting to help the victim. A unit used a foam and water mixture to help suppress the bees and temporarily restrict their flight. Crews were able to provide care to the victim once this tactic was used. HB Public Works responded and stated there were no more bees in the area and it is unknown if it was a passing swarm or if there was a bee hive nearby.

HB Fire Department wants to remind everyone to be aware of their surroundings and if you come into contact with a swarm of bees or a bee hive, act calmly and leave the area quickly and quietly. If you or anyone gets stung and needs medical treatment, please call 9-1-1.
